Phone: +919643928848

SUMMARY

Data and AI engineer with experience delivering enterprise reporting and data solutions across SAP HR, Finance, and Treasury systems. Skilled in Python, SQL, machine learning, and deep learning, with hands-on experience building predictive models and data-driven applications. Google Advanced Data Analytics Professional Certificate holder with strong foundations in statistics and enterprise data engineering.

SKILLS

Programming: Python, SQL

Data Analysis: NumPy, Pandas, EDA, Data Cleaning, Feature Engineering

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Model Evaluation

Deep Learning: PyTorch, TensorFlow, CNNs, RNNs, Transformers, NLP, Computer Vision

Visualization: Power BI, Matplotlib

Deployment / Tools: Flask, Streamlit, Git, GitHub

Math: Probability & Statistics, Linear Algebra

WORK EXPERIENCE

Technical Lead — HCL Technologies Ltd.

Sep 2024 – Present

- Designed and delivered 15+ enterprise reporting and analytics solutions by extracting, transforming, and validating HR, Finance, and Treasury data, converting raw enterprise data into business-ready insights.
- Managed the enterprise data pipeline lifecycle, including data extraction, validation, transformation, testing, and migration across Development, Quality, and Staging environments to ensure reliable and accurate reporting.
- Collaborated with 4–5 cross-functional business and functional teams over multi-week to multi-month engagements to translate reporting requirements into accurate, data-driven analytical solutions.

PROJECTS

Book Recommender System — Academic Team Project (IIITD)

Feb 2024 – May 2024

- Designed and evaluated content-based, collaborative filtering, and hybrid recommendation models on the Book-Crossing dataset (271K+ books, 279K+ users, 1.15M+ ratings) as part of a 6-member team.
- Implemented TF-IDF, cosine similarity, and collaborative filtering approaches; the TF-IDF model achieved the best performance (F1: 0.72), outperforming collaborative (0.69) and hybrid (0.70) models.
- Deployed the recommendation engine as an interactive Streamlit application with a feedback loop that dynamically re-weighted similarity scores based on user ratings.

Number Plate Recognition using CV & OCR — Personal Project

Feb 2023 – May 2023

- Developed an end-to-end license plate recognition pipeline using Haar Cascade, Canny Edge Detection, image preprocessing, and EasyOCR for automated character extraction from vehicle images.
- Integrated preprocessing, plate localization, cropping, OCR, and text extraction into a complete computer vision workflow for real-world vehicle images.

EDUCATION

Indraprastha Institute of Information Technology, Delhi

2020 – 2024

Bachelor of Technology in Computer Science and Artificial Intelligence

KIIT World School, New Delhi

2004 – 2018

Senior Secondary School Education

CERTIFICATIONS & LANGUAGES

- Google Advanced Data Analytics Professional Certificate
- Languages: English (Intermediate), Hindi (Fluent)
